# **High Pressure Diffuser**

ISOKINETIC HIGH PRESSURE DIFFUSER

he high pressure diffuser was designed for use with Lighthouse Handheld, Solair, and ApexZ airborne particle counters in applications where the sample is under pressure. Standard applications include the sampling of CDA, nitrogen, and other inert gases.

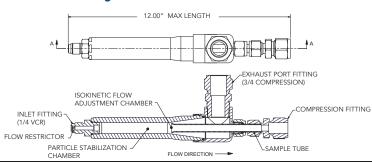

Available in vented or ported versions, the configuration is determined by the excess sample gas being vented into the test area (vented model) or exhausted outside of the test area (ported model).

## FEATURES
