

Universal Manifold II

UNIVERSAL MANIFOLD AND CONTROLLER

The Universal Manifold II and Manifold Controller collect data from up to 32 locations via multiplexed monitoring. The manifold design allows shorter purge times, increasing the number of samples per day. Users view data, configure, and control the system on the Manifold Controller, which can be placed at a convenient location up to 4,000 feet from the Universal Manifold II.

The Universal Manifold II and Manifold Controller interface with Lighthouse particle counters and existing building automation and facility management systems, providing the lowest cost per point on the market.

FEATURES

- Multiplexed monitoring up to 32 locations
- Localized control
- Local display of current and historical data
- Faster purge times equals more samples per day
- Low flow alarm
- 2 Year Warranty
